How to Measure Your Child's Feet:

- *Have your child stand on a piece of paper. Mark the longest points of the foot, from the longest toe to the back of the heel. Measure this distance in centimetres to get the length.*
- *Allow 0.5 - 1cm extra when selecting shoe size, more if the child will wear socks with the shoes. Your child's toes will thank you!*
- *If your child's foot falls in between sizes, round up. The extra room won't be there for long.*
- *Children's feet grow quickly. Measure at least every 2 months during the first year, and every 3 months from 1–6 years old. You never can tell when your child will have a growth spurt!*

For the best fit, measure their feet at the end of the day - feet often swell during the day due to heat and activity.
